

PERI UP Stair 75

The lightweight aluminium flights of stairs

No restricted headroom

In-line stair towers have a 2.10m vertical clearance between treads

Flexible assembly

Small plan dimensions of 200cm x 150cm allow use in restricted spaces

Fast installation

Minimum number of ledgers and anchors, avoidance of working at height (all units assembled from ground level)

Multiple modules can be built at ground level and assembled by crane
